Experience

● Project Owner / Front End Developer
Platform Purple INC
California, USA (REMOTE)
10/2020 - **Present**

Building a platform that enables the creation of websites, mobile sites, and fully customizable e-commerce platforms, with a world-class distributed team. Leveraging the power of Vue.js, Quasar, Sass, and Node.js.

Main Technologies: Vue.js 2 & 3, Quasar Framework (Capacitor, Electron, PWA, SSR)

https://www.purple.is/

● Front End Developer
NEXT SOLUTIONS
Paris, France (REMOTE)
07/2020 - 11/2020

Developed new functionalities to optimize web solutions and conducted research to address technical challenges with innovative solutions

Main Technologies: Vue.js 2, Quasar Framework

https://www.ukart.io/

● FullStack Developer
Vneuron
Tunis, Tunisia
02/2020 - 07/2020

Specified requirements and developed new functionalities to optimize web solutions. Actively participated in product development from ideation through deployment and beyond. Contributed to two major projects: VBot, an AI assistance chat, and HAICA a fake news detection platform for the Tunisian constitutional body responsible for organizing the audiovisual sector in Tunisia.

Main Technologies: React.js, Node.js, Docker, Microservices Architecture, MongoDB

https://www.vneuron.com/

● Front End Developer and Consultant
Sopra HR Software
Tunis, Tunisia
07/2019 - 02/2020

Front-End Developer (React.js / Redux), responsible for developing, usability testing, and enhancing interactions for HR solutions. Served as a Customer Service and Customer Experience Consultant, defining customer needs and necessary functionalities. Provided maintenance for the final deployed product.

Main Technologies: React.js, HRAccess

https://www.soprahr.com/

● FullStack Developer (Intern)
HMMG
Tunis, Tunisia
01/2019 - 07/2019

Responsible for specifying requirements, developing new functionalities, project design, and usability testing for ComeTrip a responsive web platform offering short-term property rental services in Senegal as an alternative to Airbnb. The platform aims to enhance accessibility and expedite the process of short-term real estate rentals

Main Technologies: Vue.js, Node.js, MongoDB (Mongoose)
