Profile

Senior Software Engineer with 7+ years of experience designing and delivering scalable web and cross-platform applications. Proven track record in leading frontend architecture, owning product delivery, and building high-performance systems across Web, Mobile, and Desktop environments. Strong focus on system design, performance optimization, and maintainable frontend engineering.

Professional Experience

Senior Front-End Engineer 09/2020 – Present

Platform Purple INC – Remote (USA)

- Architected and led frontend development of a cross-platform website builder [purple.is](#) used by 100+ enterprise clients and thousands of end users, unifying Web, Mobile, and Desktop experiences into a single system.
- Designed and delivered major product capabilities including website building, VOD publishing, customer management, analytics dashboards, reporting, and community moderation.
- Built and maintained a unified Vue.js/Quasar codebase powering Web, Mobile (Capacitor), and Desktop (Electron) applications, ensuring consistent behavior across all platforms.
- Drove frontend performance through SSR, lazy loading, code splitting, and continuous refactoring, while establishing engineering standards and leading code reviews.
- Translated business requirements into scalable technical solutions and influenced product direction.
- *Technologies: Vue.js 2/3, Quasar, Capacitor, Electron, Node.js, SSR, PWA, Cypress*

Full-Stack Developer 02/2020 – 09/2020

Vneuron – Tunis, Tunisia

- Delivered full-stack features across frontend and backend in an Agile environment, contributing to production systems.
- Contributed to the development of a United Nations-funded fake news detection platform for Tunisia's audiovisual regulatory authority.
- Developed features for a COVID-19 assistance platform connecting citizens with healthcare professionals during the pandemic.
- *Technologies: React.js, Node.js, MongoDB, Docker*

Front-End Developer & Consultant 07/2019 – 02/2020

Sopra HR Software – Tunis, Tunisia

- Rebuilt legacy HR modules using React.js, modernizing enterprise frontend architecture and significantly improving maintainability and developer experience.
- Collaborated with enterprise clients to deploy, configure, and customize HR solutions based on business requirements.
- *Technologies: React.js, HR Access*

Full-Stack Developer (Intern) 01/2019 – 07/2019

HMMG – Tunis, Tunisia

- Designed and developed [ComeTrip.sn](#), a responsive short-term rental platform for the Senegalese market.
- Owned end-to-end development of the product, including requirements analysis and implementation of core features.
- *Technologies: Vue.js 2, Nuxt.js, Node.js, MongoDB*

Technical Skills

Frontend:	JavaScript (ES6+), Vue.js (2/3), React.js, Nuxt.js, Next.js, Quasar Framework
Backend:	Node.js, Express, REST APIs, Microservices, WebSockets, MongoDB, SQL, Redis
Cross-Platform:	Electron, Capacitor, PWA
Tooling:	Vite, Webpack, Docker, Git (GitFlow)
Testing:	Jest, Cypress
Practices:	System Design, Agile/Scrum, Code Reviews, Clean Code

Education

Higher Institute of Technological Studies of Radès	2016 – 2019
Tunis, Tunisia	
Bachelor in Information Systems Development
